Sustainability

THIS IS WHY READYCUP IS GOOD FOR YOU AND THE ENVIRONMENT:

- **100% VEGETABLE**
- **100% GLUTEN FREE**
- **RICH IN FIBER**
- **100% ORGANIC** All ingredients are 100% certified organic
- **NO GMO**
- **RECYCLABLE MATERIALS**

The goodness of our cup is guaranteed by the use of rigorously certified Italian organic fruit and vegetables, of sustainable origin and grown using traditional methods.

WHAT FIBER!

Our products are rich in fiber and vegetable proteins, and this leads to great health benefits for those who consume them. It increases the sense of satiety, strengthens the digestive system, keeps blood sugar low by reducing the absorption of fats and these are just some of the advantages of dietary fibers.

GLUTEN FREE IS BETTER

The total absence of gluten makes our cups friends with celiac disease and anyone with an intolerance to gluten or following a diet that discourages its use.

WITH LESS CARBO IS + LIGHT

Our foods contain only a minimal amount of healthy carbohydrates.

VEGAN FRIENDLY

All our cup varieties are also perfect for vegans.

THIS IS WHY IT'S GOOD FOR THE ENVIRONMENT:

Intensive agriculture is a harmful system that carries a high risk of environmental pollution. Instead, we choose ingredients grown naturally with traditional methods.

MADE IN ITALY

The ingredients we use come from Italian organic crops. Except for turmeric, quinoa and any other exotic flavors that for obvious reasons can't be found... at the delicatessen!

LESS WATER

For the production of our products, only a very small amount of water is transported and this considerably reduces the environmental impact of this type of transport.

RECYCLING IS GOOD!

The packaging of our products is made with recycled and recyclable materials, which after use can have a new life and be used in other ways.

NO PLASTIC HERE!

The packaging of the cups are made exclusively with 100% compostable paper.
